

RISHABH MAHADIK

FULL STACK DEVELOPER | MERN STACK

+917977544304 Room no :2 Ganesh Chowk Borivali (east) Mumbai mahadikrishabh09@gmail.com

<https://www.linkedin.com/in/rishabh-mahadik-630bb62a6/> <https://github.com/rishabhxbuilds>

PROFESSIONAL SUMMARY

Technically proficient IT Engineering student with expertise in Python, Java, C++, and full-stack development using the MERN stack and Node.js. Strong understanding of Data Structures, system design, and application architecture, with the ability to solve complex problems efficiently. Experienced in building real-world applications with a focus on scalability, performance, and clean architecture. Highly motivated to innovate and compete in hackathon environments.

EDUCATION

Diploma In IT CGPA 9.3
2022 - 2025
Shri Bhagubai Mafatlal Polytechnic, Mumbai

BTECH IN IT
2025-2028
vidyalankar Institute of Technology , Mumbai

INTERNSHIP / WORK EXPERIENCE

May, 2024 - June, 2024 Mesh Digital Services	Full Stack Developer , Intern - Developed and maintained full-stack web applications using modern technologies, ensuring responsive and user-friendly interfaces. - Designed and implemented RESTful APIs and handled backend logic for efficient data processing and integration. - Worked on real-world projects involving dynamic UI development, state management, and database interactions.
---	---

SKILLS

- Programming Languages: Python, Java, C++, C
 - Full-Stack Development: MERN Stack (MongoDB, Express.js, React.js, Node.js)
 - Backend Development: RESTful APIs, Server-side Architecture
 - System Design: Scalable Application Design, Architecture Fundamentals
 - Core Concepts: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
-

CERTIFICATES & ACHIEVEMENTS

- MongoDB Certification – Traversy Media
 - MERN Stack Development – Udemy
 - Unity Game Development – Udemy
 - Runner-Up – Tech Auction, IGNITE IT 2024
 - Published Paper – Multicon 2025 (Stock Market Simulator)
-

PROJECTS

Virtual Stock Market Simulator (Python, React.js, Node.js, MySQL)

Developed a full-stack stock trading simulator enabling users to perform virtual trades with portfolio management and real-time/simulated data tracking.

Smart Invoice Pro (Flutter, Dart)

Built an Android application for generating invoices and managing client data with automated calculations and a user-friendly interface.

Postman Clone Desktop Application (Flutter, Dart)

Developed a desktop-based API testing tool to send HTTP requests and analyze responses for efficient API debugging.

LIC Management System (Java, JDBC, MySQL)

Created an Advanced Java application to manage insurance data with database connectivity and structured record handling.

Stationary E-commerce Website (MERN Stack)

Developed a full-stack e-commerce platform with product management, cart functionality, and order processing.
